Who we are

International Mapping provides custom mapping solutions for the analysis and presentation of geographic information. For a small company, we provide a broad array of services and have wide ranging experience with government and commercial projects. Our principals each have over 25 years of work in mapmaking, GIS, and consulting. We provide these services:

- GIS Analysis and Data Compilation
- Map Production and Finishing
- Interactive Maps
- Boundary and Geographic Consulting
- Mobile Map Application Development
- Terrain and landscape modeling
- Digital fly-throughs and fly-overs
- Map animations
- Data Visualizations
- Cartographic Consulting and Map Design

What makes us different

Established in 2000, International Mapping is located in the Baltimore-Washington technology corridor with ready access to federal government agencies and to a wealth of research facilities including the Library of Congress and the National Archives. We are a small business that can move nimbly to support our clients and teaming partners on projects of all sizes. We have worked as a prime and as a subcontractor for federal government projects.

International Mapping is an expert geo-spatial company that combines traditional work in GIS and Cartography with speciality services in terrain modeling and boundary consulting. Our work in 3-D modeling of terrains, cities, and landscapes has won design awards and been featured in print, movies, and interactive products. Our expertise in international boundaries is unparalleled.
