

App Development

Smart phones and tablet devices have revolutionized the way people interact with their surroundings. Mobile applications on these devices have become essential tools, helping people access, organize, and manipulate information so that it is more useful. At International Mapping, we specialize in the development of geography themed mobile applications. Most are based on an interactive map and all are carefully crafted to be easy-to-use and rich in content. Whether you are looking to develop an outdoor recreation map app, an interpretive map guide, or any other type of geographic application, we are your partner.

SERVICES

- Application development for the iOS (iPhone and iPad)
- Outdoor recreation guides
- Visitor center guides
- History applications
- Printed travel guide to mobile travel guide conversions
- Adobe Flash (Actionscript 3) application conversions
- Mapping elements for Apps

"With the PATC-Shenandoah app, International Mapping has taken the PATC's maps to a new and exciting level by adding a suite of navigation and customization capabilities for hikers. The IM team has demonstrated their ability to provide the PATC with a product we feel proud of, and one that we feel will help support the use and maintenance of the trail system for future generations to come."

Brian Goudreau – PATC Maps Committee Chair
