

# Parks & Outdoor Recreation

To help bring outdoor locations to life, we use shaded relief maps and 3-D perspective models to illustrate parks, bike paths, campgrounds, wineries, ski runs, and other recreational destinations. Our award-winning designs not only highlight the unique features of natural and historic landscapes, but also enhance the user's experience by showing related sites, activities, services, amenities, and community resources. We are also proud to partner with Solid Terrain Modeling, Inc. of Fillmore, CA to produce breathtaking 3-D physical terrain models now seen in many national parks and visitor centers across the country.

## SERVICES

- Custom static and interactive mapping content for all media (print, web, kiosk, video, and mobile)
- Creative graphic design capabilities in 2-D and 3-D
- Language translation capabilities
- Research, compilation and editorial services
- New media planning to ensure flexible map and graphic file format deliveries
- Graphic illustrations and animations
- Source map acquisition
- Promotional products and related graphics
- Trail guides
- 3-D physical terrain models
- Interactive maps using Google and Bing APIs

*"NOAA's National Marine Sanctuaries entrusted the development of their Marine Sanctuary Site Atlas to International Mapping. The resulting product is a beautiful work of art, one that effectively illustrates the diversity and geographic locations of our National Marine Sanctuary System. We could not be more pleased with our decision to work with them on this initiative."*

Matt Stout – National Marine Sanctuaries

*"International Mapping seamlessly took over our mapping program after our previous partner suddenly went out of business. Their eye for detail and dedication to 'getting it right' ensures our 500 franchisees that their maps will be clear, accurate and up to date."*

Mike Gast – Campgrounds of America, Inc. (KOA)
