

Transportation

International Mapping works closely with corporations and local agencies to create private service line maps and public transit maps that enhance relevant information while maintaining a high level of design that coordinates with other marketing materials. As a single-source provider, we cover the entire map development process — from page layouts, design templates, and map compilation to editing, indexing, maintenance, printing and interactive file formatting.

SERVICES

- Custom static and interactive mapping content for all media (print, web, kiosk, video, and mobile)
- Research, compilation and editorial services
- GIS services
- Pre-press, press check and print brokering services
- Large program planning to ensure best use of budgets
- New media planning to ensure flexible map and graphic file format deliveries
- Source map acquisition
- Graphic illustrations and animations
- Language translation capabilities

“Alex Tait and his team at International Mapping provide innovative solutions that address the thorny challenges inherent in presenting geographical and other data-intensive information in a compelling and highly usable way. They understand that elegant, thoughtful design serves an enormously powerful role in conveying complex information in an elegant fashion. The firm’s technical and design expertise is combined with consistently responsive customer service and a high degree of professionalism.”
